čiré díly / clear parts

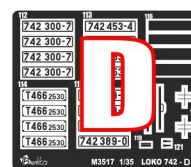

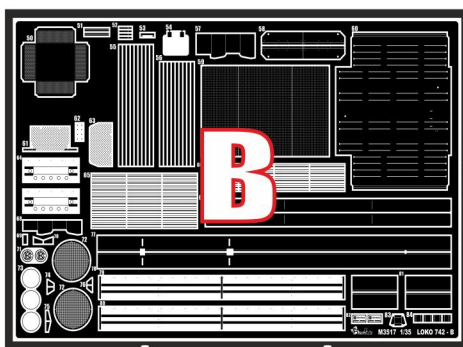

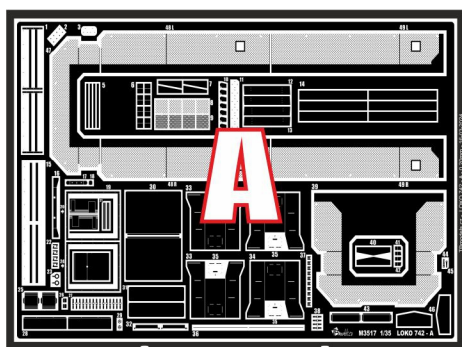

3D tištěné díly / 3D printed parts

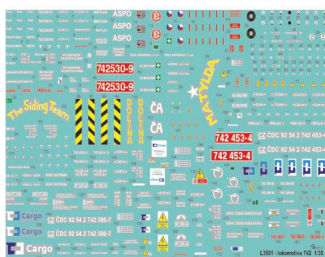

hliníkový čep / aluminium pin

fotoleptané díly / photoetched parts

obtisky / decal sheets

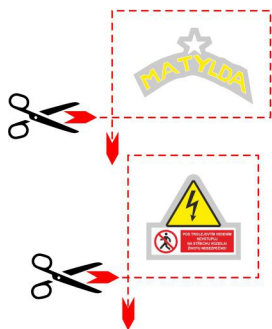

další doplňky v této krabici other accessories in this box:

- silikonová hadička / silicone tube 1,2mm - 30cm
- silikonová hadička / silicone tube 1,9mm - 25cm
- drát / wire 0,4mm - 3cm
- drát / wire 0,6mm - 60cm
- drát / wire 1mm - 10cm
- 1x čirá folie / clear sheet styrene
- vytištěný návod / printed manual

Návod pro práci s obtisky / instructions for working with decals

- 1.)  Obtisky s ochranným lakem  pouze na samostatném obtisku
Decals with protective varnish  only on a separate decal

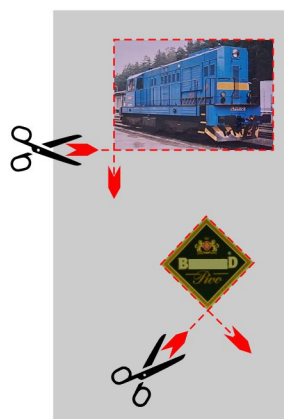

- každý obtisk vystříhnout 1-2mm od potisku (za tuto oblast lze uchytit pinzetou)
- na několik vteřin namočit do teplé vody až se papír provlhčí tak, že se dá s obtiskem po papíru pohybovat
- přenesete na správné místo na modelu a štětečkem stáhnete z papíru
- odsát a vytlačit z pod obtisku zbylou vodu

- cut each decal 1-2mm from the print (you can grab this area with tweezers)
- soak in warm water for a few seconds until the paper is wet so that you can move the decal on the paper
- transfer it to the right place on the model and use a brush to remove it from the paper
- suck and squeeze out the remaining water from the decal

- 2.)  Obtisky s ochranným lakem  na celé ploše papíru
Decals with protective varnish  on the entire surface of the paper

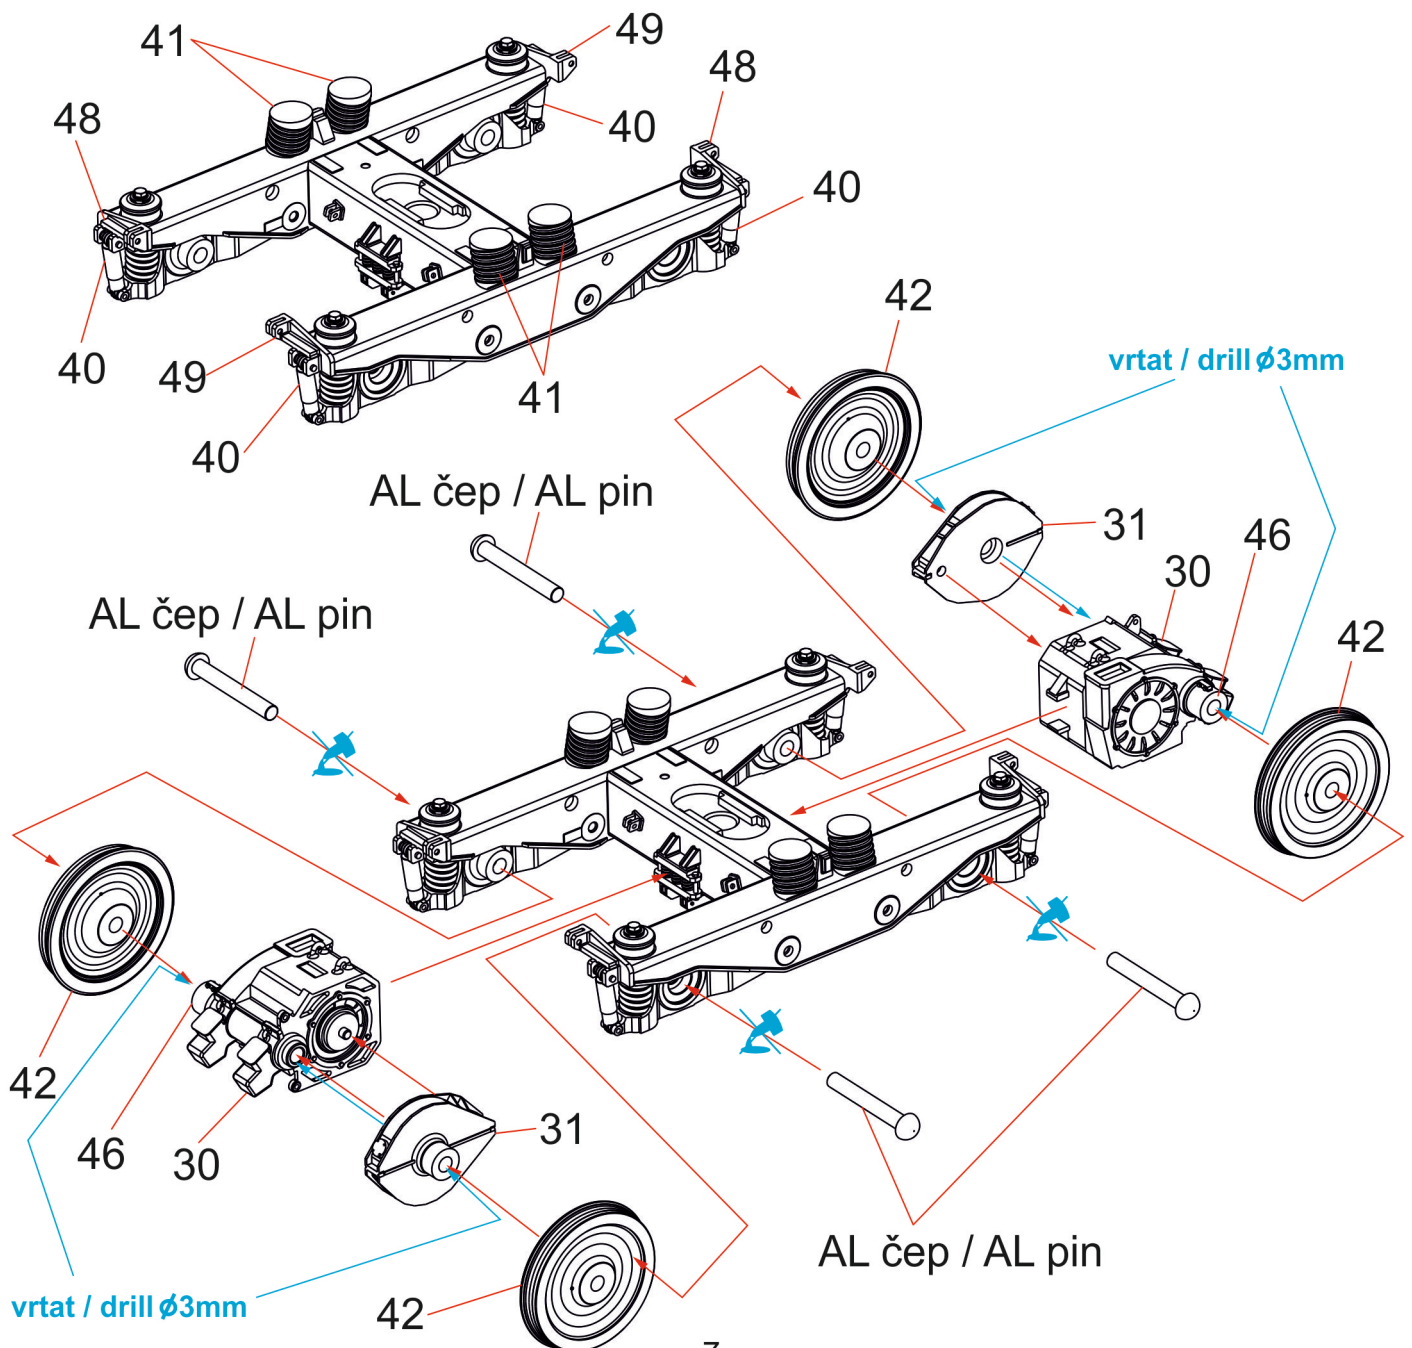

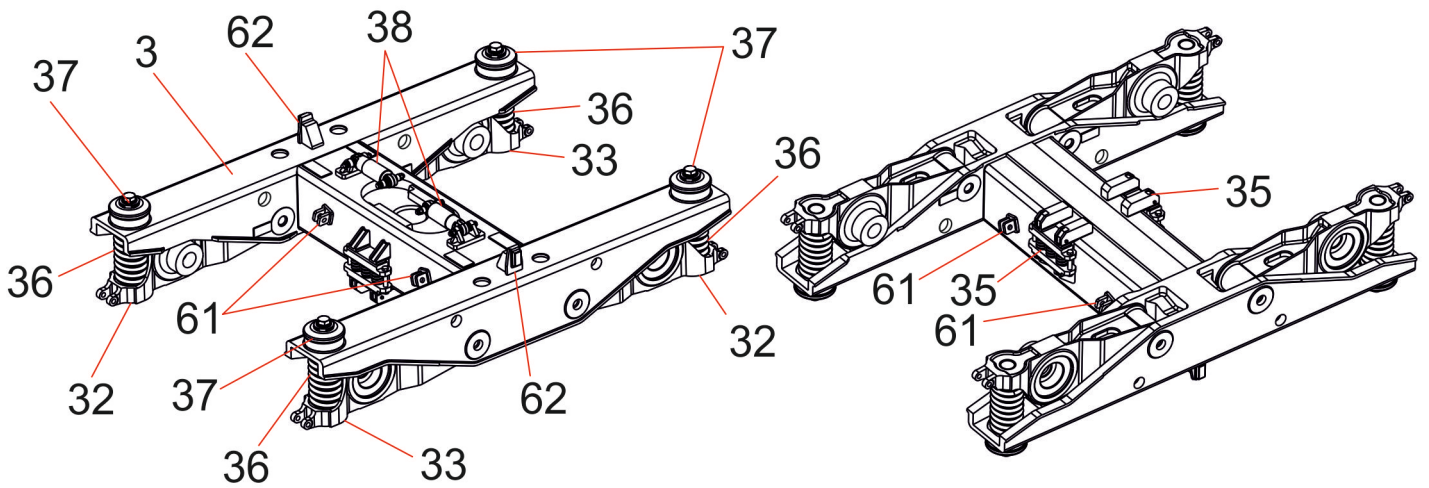

- každý obtisk je nutno vystříhnout co nejlíže k potisku
- na několik vteřin namočit do teplé vody až se papír provlhčí tak, že se dá s obtiskem po papíru pohybovat
- přenesete na správné místo na modelu a štětečkem stáhnete z papíru
- odsát a vytlačit z pod obtisku zbylou vodu

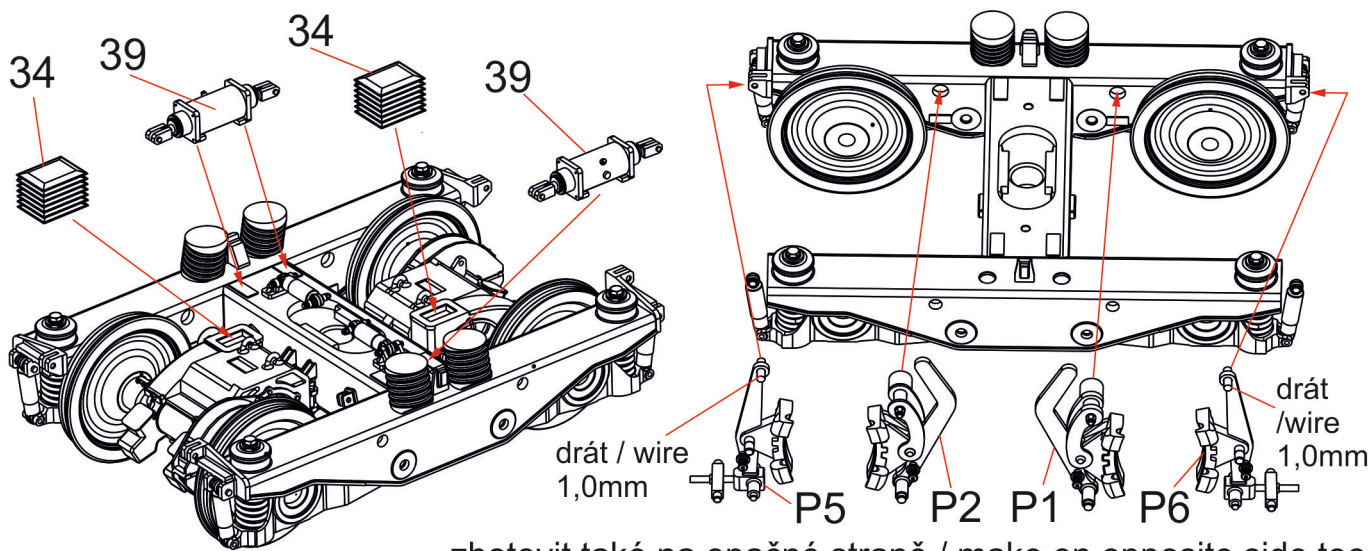

- each decal must be cut out as close to the print as possible
- soak in warm water for a few seconds until the paper is wet so that you can move the decal on the paper
- transfer it to the right place on the model and use a brush to remove it from the paper
- suck and squeeze out the remaining water from the decal
